WHO I AM

Ken Slater hails from Somers, Connecticut, where there is little to do other than labor in a manual fashion and take things apart. This boredom lead him to an insatiable need to know how things work and to be doing work at all times. Both desires have served Ken well in his position as an Interactive Art Director at Crispin Porter + Bogusky, where he specializes in design, development, and "making shit happen." His work has collected a few shiny acknowledgements along the way, such as Clios, Pencils, ANDYs, and Lions. However, Ken's favorite shiny things are Camaros and the television show COPS even though the only thing that's shiny are the badges. He currently resides in Boulder, Colorado with two women. He's living the dream.
